Office Action Summary

Application No.

09/609,001

Applicant(s)

HEILBRON ET AL.

Examiner

Thomas Duong

Art Unit

2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 April 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-25 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

RD

DETAILED ACTION

Response to Amendment

1. This office action is in response to the applicants Amendment filed on April 28, 2005. Applicant amended *claims 1, 13, 22, and 25*. *Claims 1-25* are presented for further consideration and examination.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
3. *Claims 1-25* are rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (US006405192B1) and in view of Becker et al. (US006834372B1).
4. With regard to *claims 1, 13, 22 and 25*, Brown reference discloses,
 - *fetching a current web page, the current web page including one or more links, each link pointing to a web page; (Brown, col.2, lines 15-17; col.6, line 20; col.6, line 66 – col.7, line 2; module 610, fig.6; module 720, fig.7A)*Brown teaches of retrieving a web page for presentation to a user. While the web page is being presented, the web page is parsed for a set of links to a set of linked web pages based on criteria set by the user and those links are retrieved from their respective locations.

- *fetching information from each linked web page, the information regarding the web page to which each link points, wherein the information is stored separately from the current web page; (Brown, col.2, lines 15-17; col.6, lines 21-27)*

Brown teaches of retrieving a web page for presentation to a user. While the web page is being presented, the web page is parsed for a set of links to a set of linked web pages based on criteria set by the user and those links are retrieved from their respective locations.

- *assembling relational information based on the fetched information from each linked web page, (Brown, col.2, lines 15-17; col.6, lines 21-27)*

Brown teaches of retrieving a web page for presentation to a user. While the web page is being presented, the web page is parsed for a set of links to a set of linked web pages based on criteria set by the user and those links are retrieved from their respective locations.

- *displaying the current web page; and, (Brown, col.2, lines 15-17; col.6, line 20; col.6, line 66 – col.7, line 2; module 610, fig.6; module 720, fig.7A)*

Brown teaches of retrieving a web page for presentation to a user. While the web page is being presented, the web page is parsed for a set of links to a set of linked web pages based on criteria set by the user and those links are retrieved from their respective locations.

- *displaying an informational region, in response to a cursor hovering over a particular link of the one or more links, the region including the information previously fetched regarding the web page to which the link points and the relational information previously assembled. (Brown, col.9, lines 46-59)*

Brown suggests of opening another window (pop-up) and displaying the desired information within the new window to the user as the pointer passes over a link.

The desired information is related to the user through the configured criteria defined by the user.

However, Brown does not explicitly teaches,

- *the relational information including at least one historical relationship between the fetched information and a user of the client-side computer;*

Becker teaches,

- *the relational information including at least one historical relationship between the fetched information and a user of the client-side computer;* (Becker, col.1, line 66 – col.2, line 20; col.2, lines 37-42; col.2, line 56 – col.3, line 11; col.4, lines 20-27; col.7, lines 29-36, lines 58-59; col.11, lines 8-10)

Becker teaches of “*presenting information representing various characteristics from past visits to the hyperlinked web site*” (Becker, col.2, lines 40-42) in

response to the user’s “*placement of a cursor over a hyperlink*” (Becker, col. 2,

line 3). Becker teaches of utilizing a database to “*[contain] information about the*

historical internet activities of the user of the computer” (Becker, col.4, lines 26-

27) and that “*each personal database provides historical hyperlink access*

information for one or more users of a particular computer” (Becker, col.7, lines

29-31). Hence, Becker teaches of a method “*to present historical information*

about hyperlinks shown on the web page” (Becker, col.11, lines 8-9).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of

the invention was made to combine the teachings of Becker with the teachings of

Brown reference to “*avoid the time consuming pitfalls of selecting certain hyperlinks*”

(Becker, col.3, lines 12-13) (i.e. links of expired web pages or undesirable characteristics) as pointed out by Becker. This *"ultimately helps computer users improve their time efficiency while utilizing the Internet"* (col.3, lines 13-15) as well as reduce the overall Internet traffic by avoiding undesirable links. According to Becker, *"beneficially, whenever a user place the cursor near a hyperlinked web site, the invention conveniently presents a data-packed report of various useful characteristics from the user's past visit(s) to that web site"* (Becker, col.2, lines 58-61).

5. With regard to claims 2-4, 14 and 23, Brown and Becker disclose,

- *wherein displaying the informational region comprises displaying the informational region by the link.* (Brown, col.9, lines 46-59)

Brown suggests of opening another window (pop-up) and displaying the desired information within the new window to the user as the pointer passes over a link.

The desired information is related to the user through the configured criteria defined by the user.

- *wherein the method is such that a user is able to retrieve the information regarding the web page without selecting the link and committing to downloading the web page.* (Brown, col.9, lines 46-59)

Brown suggests of opening another window (pop-up) and displaying the desired information within the new window to the user as the pointer passes over a link.

The desired information is related to the user through the configured criteria defined by the user. Furthermore, *claim 3* is contradicting with the independent *claim 1* because *claim 1* calls for *"fetching information regarding the web page to*

which each link points” and “the region including the information previously fetched regarding the web page to which the link points and the relational information previously assembled” whereas claim 3 specifies that the “information regarding the web page [is retrieved] without selecting the link and committing to downloading the web page”.

- *wherein the informational region comprises a text box apparently floating near the link. (Brown, col.9, lines 46-59)*

Brown suggests of opening another window (pop-up) and displaying the desired information within the new window to the user as the pointer passes over a link.

The desired information is related to the user through the configured criteria defined by the user.

6. With regard to claims 5-12, Brown and Becker disclose,

- *wherein the information regarding the web page includes at least one of: keywords of the web page; paragraph headings of the web page; links on the web page to other web pages. (Brown, col.2, lines 15-21; col.6, lines 20-27; col.9, lines 2-11)*

Brown teaches of positive preferences (or criteria) that may relate to content, key words, date of creation, author, etc. The web pages associated with the links from the first web page are parsed for these criteria and the results are presented to the user.

- *wherein the information regarding the web page includes at least information regarding whether the link is broken. (Brown, col.8, lines 22-37)*

Art Unit: 2145

- *further comprising disabling the link in response to determining that the web page includes content that a user is not allowed to view. (Brown, col.8, lines 48-54)*

7. With regard to claims 15-21 and 24, Brown and Becker disclose,

- *wherein fetching the information regarding the web page to which each link points comprises retrieving the information from a server on which the information is stored. (Brown, col.2, lines 15-17; col.6, lines 21-27)*

Brown teaches of parsing the retrieved web page for a set of links to other web pages and retrieving those web pages from their respective locations.

- *wherein fetching the information regarding the web page to which each link points comprises retrieving the information from a local cache in which the information is stored. (Brown, col.11, lines 45-55)*

Brown teaches of retrieving the information from the cache.

Response to Arguments

8. Applicant's arguments with respect to *claims 1, 13, 22, and 25* have been considered but they are moot in view of the new grounds of rejection.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE**

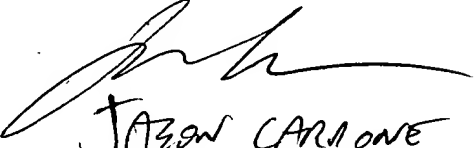

Art Unit: 2145

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Duong whose telephone number is 571/272-3911. The examiner can normally be reached on M-F 7:30AM - 4:00PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Valencia Martin-Wallace can be reached on 571/272-6159. The fax phone numbers for the organization where this application or proceeding is assigned are 703/872-9306 for regular communications and 703/872-9306 for After Final communications.
